PRESENTATION TYPES and DESCRIPTIONS:

Professional Development Workshops impart skill and knowledge for integration into clinical practice and research. These workshops are scheduled for 1 ½ to 2 hours, including a question and answer period, and scheduled breaks when appropriate.

Symposia are formatted to allow the interchange and/or discussion of ideas relevant to the convention theme (Not paper-reading sessions). These sessions are scheduled for 60 minutes including time for questions.

Paper sessions focus on the author's contribution to clinical practice, research and/or theory as developed for formal presentation. The paper session is scheduled for 30 minutes including questions. Note: Papers on similar topics may be grouped together by the program committee in which case the sessions may or may not be extended.

Poster sessions focus on the presentation of the author's contribution to research and/or theory through illustrative materials displayed on posters. The presenter provides all needed materials and remains with his/her poster during specific times of the convention so that viewers may have the opportunity to ask questions and exchange ideas.
